THE IMM COVER FOR HEAVIEST APPLICATION

MEGA COVER

INTERPUMP

FLUID SOLUTIONS

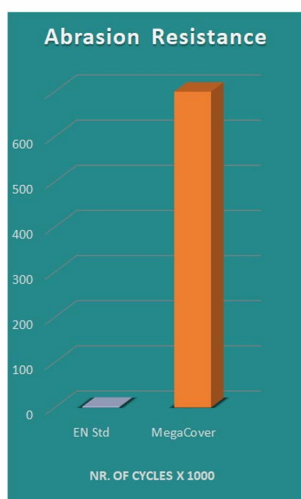

Powered by I.M.M. Hydraulics

IMM MEGA COVER ensures a superior hose protection for the forestry, earth moving, ecological and industrial applications.

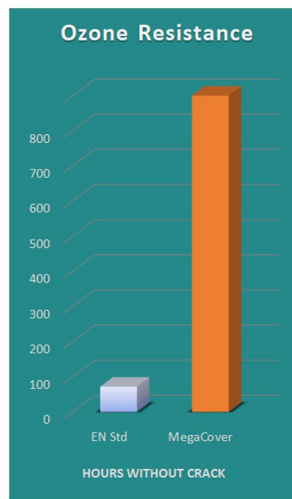

IMM MEGA COVER ensures:

- **Superior abrasion resistance: even after 300 times the standard nr. of abrasion cycles the quantity of lost material is far from the standard limits. The MEGA COVER protects the hose from rubbing against the steel parts of the machine and the abrasion between the hoses in the bundles without any additional external protection.**
- **Superior resistance to the high ozone concentration and sun exposure for long term reliability**
- **Superior resistance to the contact with aggressive substances for high reliability even in aggressive environments.**

ISO 6945

ISO 7326

The special UHWMPE cover is available for the entire IMM rubber hose range with steel wire reinforcement.
